TENNESSEE GAS ASSOCIATION

2012-2013 Classroom Training

"I confidently recommend Tennessee Gas Association (TGA) Classroom Training. As a member of the TGA Educational Steering Committee, I am aware of the thought and preparation that has gone into this effort for members of the TGA. Modules offered by TGA certified instructors focus on operator qualification training for needs identified by pipeline safety engineers during the inspection process. Effective operator qualification training is through many vendors and consultants and the TGA is certainly one that is highly recommended."
